TRANEXPLUS™
RENEWAL ESSENCE

DQ TranexPlus™ is a **professional mesobooter** solution targets and blocks pigmentation at all levels and pathways, delivering unparalleled results.

This revolutionary skin-transforming product, formulated with a potent blend of key ingredients to unveil your skin's radiant potential.

Our advanced formula combines Tranexamic Acid, Hyaluronic Acid, Niacinamide, Vitamin C, and Glutathione to address multi ple sin concerns and deliver unparalled results.

Pigment and tone corrector (before)

Pigment and tone corrector (after)

Pigmentation is one of the main skin concerns that affects individuals of all ages and genders. Due to its multifactorial etiologies, most treatments fail to address all ongoing cascades of melanin synthesis.

Dermaqual has meticulously formulated TRANEXPLUS™ to cover all possible aspects of pigmentation, ensuring a comprehensive approach to skin lightening and brightening

TRANEXPLUS™ is designed to inhibit melanin production, reduce the appearance of darks, and prevent new ones from forming.

TRANEXPLUS™ MECHANISM OF ACTION

OPTIMUM DOSAGE IN THE MARKET:

TNX	HMW HA	LMW HA	NIACINAMIDE	VITAMIN C	GSH
90 mg	37.5 mg	37.5 mg	25 mg	10 mg	1 mg

Together, these potent ingredients work synergistically to address multiple skin concerns, including hyperpigmentation, dehydration, uneven texture, and signs of aging, leaving you with a complexion that is visibly brighter, smoother, and more youthful.

ACTIVE INGREDIENT COMPLEX

TRANEXAMIC ACID (TXA)

Works primarily by directly inhibiting the activation of plasminogen to plasmin inside keratinocytes and melanocytes, which blocks the prostaglandin synthesis cascade, leading to the inhibition of inflammation and vascularization. TXA also interferes with keratinocyte-melanocyte interactions.

HYALURONIC ACID (HA)

Deept hydrates and plumps the skin, restoring moisture levels for a supple and youthful appearance.

NIACINAMIDE (VIT. B3)

Offers a multitude of benefits for the skin. It helps to strengthen the skin's barrier function and has anti-inflammatory properties. It inhibits melanosome transfer to keratinocytes.

ASCORBYL GLUCOSIDE (VIT. C)

An activated form of Vitamin C with a suitable pH, is a powerful antioxidant that brightens the skin and helps protect against environmental damage by neutralizing free radicals.

GLUTATHIONE (GSH)

Detoxifies the skin, removing impurities and promoting a healthy, radiant glow from within.

Antioxidant, brightens the skin and reduces melanin production

Tackle resilient pigmentation and melasma.

Strengthens the skin's barrier and reduces inflammtion
